

Embedded Works appointed as VAR for OriginGPS, the market leader in GNSS/GPS modules.

Embedded Works will now be offering the world's smallest GNSS/GPS modules, further enhancing its wide portfolio of embedded wireless solutions.

Santa Clara, CA USA – March 28, 2017 Embedded Works, a distributor of embedded wireless IoT & M2M components, announced it has been appointed to be an authorized distributor of [OriginGPS's](#) GNSS/GPS products. Incorporating the fully-integrated modules enables shortening development cycles in advanced solutions and addresses growing demands for IoT-enabled products.

Since 2004, Embedded Works has provided a full spectrum of wireless technologies for the embedded and wireless market place, assisting design engineers and IoT companies to integrate the latest in WLAN and WWAN solutions. The agreement includes OriginGPS's comprehensive family of [ultra-small GNSS/GPS modules and antenna products](#), which establish absolute reliability and sensitivity for precision GNSS/GPS solutions.

“OriginGPS has completely changed the landscape on how solution engineers and systems integrators design global positioning solutions. We are excited to add OriginGPS as a new partner to our program of world-class suppliers, and thus provide our customers additional cost savings with simple implementations for GNSS/GPS embedded solutions,” said Andy Do, President of Embedded Works.

“We selected Embedded Works for its extensive working knowledge of IoT-enabling products and advanced navigation technologies. OriginGPS's small form factor GNSS/GPS modules are a bellwether of change for highly flexible GNSS solutions, and will enable Embedded Works to expand its offering, meeting cost and performance demands and minimizing solution footprints. Additionally, we look forward to working with Embedded Works as we expand our product lines in the near future,” said Robert van Tilburg, VP Global Sales and Business Development of OriginGPS.

About Us

Embedded Works is a value-added technology distributor and integrator aimed at the RF and wireless market. We offer a full spectrum of wireless products and services to help engineers, marketers, sales and executive management succeed in overcoming the challenges of wireless integration.

More than just a niche distributor, our company understands the complexities of RF, software development and the world of embedded design. Therefore, we've aligned ourselves with world-class suppliers and design houses to deliver end-to-end wireless solutions, from start to finish!
